Best Practices

I. Title of the Practice

1. Finishing School Programme for Final Year Students

Finishing School Programme is conducted for the third year students as a part of their regular time table.

2. Goal and the Context

The goal of this programme is to make the students understand the various skills needed to be developed in them so that they become employable and get selected by the companies in campus interviews.

Since the college is situated in a rural area, majority of the students who are admitted to various courses, belong to the nearby villages and come from very poor family background, they lack communication skills in English, self confidence, interpersonal relationship, and Mathematical Aptitude. Hence to groom them and develop the above skills in them the Finishing School Programme is conducted for final year students.

3. The Practice

In the Finishing School Programme, HR personnel from Multinational companies, Professional trainers and a few professors who have specialized in certain areas of training the students are invited. This programme is compulsory for all the students. They are trained extensively to improve their communication in English, Interpersonal relationship, Mathematical Aptitude, preparing their resume, fine tuning their personality, effectively facing the interview and active participation in group discussion.

4. Evidence of Success

At the end of the period of Finishing School Programme, a remarkable transformation has been observed in the students. The students are able to break their communication barriers. This has resulted in increase in the number of students being placed in reputed companies.

5. Problems Encountered and Resources Required

Though the students undergo this training programme, after a few days some students do not attend the programme regularly. Further we find it difficult to motivate a few students to actively participate since they are from very poor families and their confidence level is low.

II. Title of the Practice

1. Cash awards for faculty producing 100% results and university rank

On the occasion of the college Annual day celebration the faculty members who have produced 100% results in three consecutive semesters and university ranks are honoured by giving cash award.

2. Goal and the Context

The goal of this practice is to encourage and motivate the faculty members to train the students to come out in flying colours. In view of this, the institution has also incorporated remedial /booster classes within the regular time-table. This helps the teachers to concentrate on slow learners as well as the high achievers.

3. The Practice

The remedial/booster classes are incorporated in the regular work load of the faculty members. The students are categorized as slow learners and high achievers based on their performance in the first internal assessment. The slow learners are provided with supplementary materials and additional care is given to them during the remedial classes. The high achievers are trained to secure high marks and bag university ranks during the booster classes.

4. Evidence of Success

This practice has resulted in increase in the number of University ranks secured by the students in each department.

5. Problems Encountered and Resources Required

As most of the students are from rural background the faculty members are finding it difficult to train them in the stipulated hours.
